SMART.

1. SMART Board interactive whiteboard – a multiuser interactive whiteboard that enables up to four students to simultaneously write, erase and manipulate content

2. Multiuser Pen Tray – the advanced Pen Tray automatically detects tool modes

3. DViT® (Digital Vision Touch) technology – the 800 series uses cameras to distinguish between different actions and respond accordingly

SMART Board® 800 series interactive whiteboard

Collaborative learning becomes an extraordinarily natural experience with the SMART Board® 800 series interactive whiteboard – now with four-touch interactivity. Up to four students can collaborate and interact with lesson content anywhere on the interactive surface. This interactive whiteboard also features a multiuser Pen Tray with buttons that make it easy to change ink colour, right-mouse click and bring up the On-Screen Keyboard.

Multi-student collaboration

The 800 series supports whole-group and small-group learning and makes it easy for teachers to engage students with multiple learning styles. It also offers students more ways to learn and new opportunities to collaborate. With four-touch interactivity, up to four students at a time can collaborate on the interactive whiteboard and interact with digital content, without boundaries. They can use different tools or their fingers to write, draw and manipulate lesson content. The 800 series supports whole-group and small-group learning and makes it easy for teachers to engage students with multiple learning styles.

An intuitive and interactive learning experience

Two students can work simultaneously, using simple, intuitive multitouch gestures to interact with lesson material. They can toss, rotate or zoom in on content, or control applications in in Microsoft Windows® 7 or Mac Snow Leopard operating systems. Additionally, up to four students can each work independently, writing with a pen, erasing with a palm or moving objects with their fingers. And the experience is natural and easy – there's no need to access on-screen menus to switch tools or select modes.

A rich selection of classroom resources

The 800 series comes with SMART Notebook™ collaborative learning software, which supports seamless integration with other SMART products. Find over 60,000 high-quality resources on the SMART Exchange™ website. It features lessons made specifically for SMART products, including the 800 series – created either by SMART or by third-party developers.

Part of the SMART classroom

The modular design of the 800 series makes it easy to add additional technology and accessories, such as SMART projector controls. The interactive whiteboard also integrates with the SMART Document Camera™ and SMART Response™ interactive response systems. And accessories like the SMART mobile floor stand and wireless Bluetooth® connection mean that you can incorporate the interactive whiteboard into a variety of learning environments.

Key features
Multitouch experience
Four students can simultaneously write, erase, perform mouse functions and manipulate and move objects on the interactive whiteboard surface, or two students can use multitouch gestures – no special tools are required.

Freestyle interaction
The system enables up to four students to start working together without having to switch to a multiuser mode or work in confined areas. And each student can individually complete actions, such as writing in digital ink or moving objects with their fingers.

Object awareness
The 800 series recognises when you switch between using a finger, pen and eraser. You can also write with a pen, erase with a palm and move objects with a finger, without having to press buttons, access on-screen menus or replace tools in the Pen Tray.

Touch gestures
Two students can work simultaneously, using one or two fingers to perform gestures on objects, such as toss, zoom or rotate, and to interact within SMART Notebook software. The 800 series has built-in support for multitouch operating systems, like Microsoft Windows 7 and Mac Snow Leopard.

SMART Ink™
Discover a responsive and accurate writing experience with SMART Ink. It smoothes out the appearance of the digital ink, which improves the legibility of your handwriting as you write over applications, websites and videos. The ink becomes an object that you can move and manipulate.

Save function
Capture your work to SMART Notebook collaborative learning software as a screen shot that you can edit, or save your notes directly into several software applications, including Microsoft Windows versions of PowerPoint®, Word® and Excel®, as well as Adobe® Acrobat® and Autodesk® AutoCAD® software.

Durable surface
The 800 series has a low-gloss surface that is optimised for projection. The surface is compatible with dry-wipe markers and magnets and is easily cleaned.

Widescreen option
Enjoy more room to work. The wide-format 885 model gives you 20 percent more working space than a standard interactive whiteboard – ideal for classrooms that use widescreen laptops and monitors.

Warranty
The SMART Board 800 series interactive whiteboard has a two-year warranty, which is extended to five years upon product registration.

Specifications
SMART Board 880 interactive whiteboard
Size
168 cm W x 130 cm H x 16.5 cm D
